

# Why Every New Teacher Should Attend

- The New Teacher Workshop held annually at the WAAE Professional Development Conference builds and creates new supported and empowered teachers.
- Learn how we can help you with critical resources, coaching, and insight from experienced and retired educators.
- Learn how to deal with a fear of pandemic-related hardships, politicization, staff shortages and work with experienced mentors with open minds on what your agriculture program needs.
- We work at mitigating job-related stress before it is too late by assisting with classroom setup, planning hands-on agricultural curriculum, and collaborating and suggesting new ideas.
- We provide support and resources to our new teachers by supplying them with the tools needed, including the New Agricultural Educator Resource Manual and a free instructional kit to take home after the conference.
- Your membership qualifies you to apply for over 10 different state and national awards each year.
- Meet the State FFA officers and directors you will work with throughout the year at student leadership conferences, event judging, student award applications, and more.
- Learn to build a supportive staff culture.
- Understand and learn how to navigate the WI Team Ag Ed website and the National Association of Agricultural Educators website, including roster submission, dues, event payments, and so much more!

Workshop “Learning Logs,” is used every day to keep classes organized, on task, and advancing through the student learning process. It’s an amazing way to stay organized for semesters and years to come. Just one of many annual workshops.
